THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U. S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1

1. Professor Dr. Baehr, formerly of Jena and now director of the Inorganic Chemistry Institute of Greifswald University, was appointed a full professor at Greifswald University in August 1952. 25X1

2. His research work, started in Jena and continued in Greifswald, dealt with the elucidation of the structure of organo-metallic complex compounds. Baehr had undertaken a new field of research dealing with the preparation of pure metal azides. Further research in the micro-analytical field was either in process or in preparation at the Institute. In 1952, Baehr had no research funds, but 20,000 DM East had been requested for each of the three fields mentioned above for use in 1953. Dr. E. Necht, lecturer in inorganic chemistry, was engaged in a research project on the phototrophy of cuprous chloride for which a budget of 15,000 DM East had been provided.

Comment. Probably identical with Dr. rer. nat. Hörtmar Hecht, who resides at Soldmannstrasse 17, Greifswald.

25X1
